

## PRODUCT DATA SHEET

Product ID: RGA14  
Description: Rocker kernmantle rope grab

Accredited to: EN 353-2:2002 and EN 358:1999  
Material: Aluminium alloy  
Weight: 0.2kg  
Fittings: Alloy steel fittings  
Features: Lock off device, can be used on ropes with a diameter 10.5mm - 12.7mm  
Max arrest force: <math><6\text{kN}</math> (with compatible rope, eg. RGA12R)

The RGA14 is designed to provide vertical fall protection to operatives ascending /descending a ladder or structure.

- It is also used in the rope access industry, as a protection device on the safety rope.
- The RGA14 is for use with Kernmantle rope.
- Can be permanently attached to the rope, but is removable.
- These lightweight rope grabs can be used for customized adjustable length restraint lanyards.
- Additional fall protection equipment can be used to protect the user when detaching from the device at height (RGL Range).
- The unit can also be used in restraint, connecting to a suitable restraint lanyard.
