

PRODUCT DATA SHEET

Product ID RGH2
Description: Front and Rear D Harness

Accredited to: EN 361: 2002
Web material: 45mm water repellent polyester
Fittings: High tensile steel alloy
Weight: 1.15kg
Features:

- Front and rear attachment points
- Fully adjustable
- Rip stitch indicators

Sizes: Small, Standard, Large and X-Large
Please refer to the harness size guide

The RGH2 harness is the 'workhorse' of the industry. The harness is fitted with a rear D attachment and a chest-mounted front D.

- It can be used in a similar way to the RGH1, but has the added feature of the front D ring to extend its working capability.
- Using the front D, the harness can be fitted with a rope and grab system (RGA12) for vertical fall protection when an operative is making repeated ascents.
- Can also be used when restraint / work positioning is needed in either the vertical or horizontal plane.
- A variety of other devices can be used with the front D ring, but check for suitability.
- The ring connection between the chest and shoulder straps ensures no stress loading when force is applied to the front D ring.
