Features: • Phosphorescent, charged by light energy
• Reflective yarn
• Quick release buckles
• Front and rear attachment point
• Rescue strap with additional D ring

Sizes: Small, Standard, Large and X-Large
Please refer to the harness size guide

The first of it's kind - The RGH5 Super Glow features phosphorescent and reflective yarns that provide extra visibility in low-light conditions. The glow feature works when the phosphorescent webbing takes in light energy and will glow for several hours afterwards.

- Designed for use as a confined space access harness.
- The chest and leg straps comprise quick release buckles for simplicity of donning.
- The rescue strap can be used in certain fall arrest situations. Improved with a new, additional D ring for rear attachment, longer webbing and refined hook and eye fastening that is easier to disband in the event of a rescue.
- All other features as per the standard RGH5 which include front and rear attachment points, rescue strap, rip stitch indicators and is fully adjustable.
