

PRODUCT DATA SHEET

Product ID: RGK6
Description: 54mm Twistlock Aluminium Scaffold Karabiner + Captive Pin

Accredited to: EN 362:2004
Material: Aluminium
Plating: Andonised
Gate opening: 54mm
External length: 240mm
Closure type: Twist lock
MBS: 23kN
Weight: 351g

The RGK 6 is a lightweight version of the RGK 5. Like the RGK5, this RGK6 has a large gate opening allowing attachment to scaffolding and steel structures.

This karabiner is fitted with a twistlock closure which locks automatically. It can be fitted to fall arrest lanyards, but is normally seen connected to ropes and used with rope grab systems to provide vertical protection. Used throughout the industry as part of a protection system on portable ladders. It also has the option of fitting a captive pin, allowing permanent fixture to the lanyard.
