

## FOOT LOOP GUIDE

### ATTACHMENT

It is recommended that you pre-attach your foot loop to your hand ascender whilst on the ground. To attach the foot loop to the hand ascender follow the illustrations below:

#### STEP 1

Connect your chosen connector to the lower hole of the hand ascender.

#### STEP 2

Now connect the connector to the top of the foot loop.

#### STEP 3

Hold the complete system upright, to check it is correct.

### STORAGE & CLEANING

1. Ensure that when the foot loop is not in use or during transportation, it is suitably stored in a clean, dry area and away from direct source of heat or sunlight, or any potentially sharp or abrasive objects such as knives or tools.
2. If the foot loop gets wet, in use or after cleaning allow it to dry naturally.
3. The foot loop may be cleaned with a mild detergent, but must be rinsed afterwards in clean warm water. To ensure all mechanical fittings operate smoothly, rinse and/or wipe off any build up of dirt and grit.

### LIFESPAN

The lifespan of the foot loop is 10 years from the date of manufacture, irrespective of its condition. Avoiding abrasion, contamination and correct storage will prolong the life of the product.
