

RGL19

TWIN LEG ADJUSTABLE WEBBING RESTRAINT LANYARD

RGL19

The RGL19 is a twin leg adjustable restraint lanyard and is industry standard, and normally the minimum equipment issued with a harness for working at height.

The 37kN webbing used in the manufacture provides greater strength compared to other webbing and systems. The lanyard length can be adjusted to suit the application.

It is important to understand the principles of “fall restraint” as the RGL19 can only be used for fall restraint, as there is no shock absorption built into the system. If there is any risk of falling then a fall arrest product should be used. This lanyard can be fitted with any compatible EN 362 connectors.

EN 354:2010

Material:	26mm RIDGE Protect anti-bacterial polyester*
Fittings:	2x steel adjusters supplied without connectors unless stated otherwise
Length (s)	1.2m - 1.8m (including connectors)

FEATURES

Steel Adjusters

* 14 times reduction in bacterial growth, according to ISO 20743:2013 contact with *K.pneumoniae*, commonly associated with healthcare infections such as *E.coli*
