

Product ID:
RGL24

Product Name:

Single Leg Adjustable Webbing
Restraint Choke Lanyard

The RGL24 is an adjustable restraint lanyard that ensures the correct length is selected for the task in hand.

It is important to understand the principles of fall restraint as the RGL24 can only be used for fall restraint, as there is no shock absorption built into the system. If there is any possibility of a fall, then a fall arrest product should be used. The 37kN webbing used in the manufacture provides greater strength compared to other webbing and systems.

Accredited to:

EN 358:1999

Material:

26mm water repellent polyester

Fittings:

2 x RGK1, steel adjuster and an alloy choking component

Length(s):

2m including connectors

Features:

Steel adjusters

Connectors
