

PRODUCT DATA SHEET

Product ID RGR6
Description: Rescue Triangle

The RGR6 rescue triangle is easy to fit in an emergency, it is an efficient approach to ascending or descending a casualty into a safe position. It can be arranged in a matter of seconds, but must only be used in the event of a rescue.

As well as the adjustability, the colour coded webbing and stitch patterns make fitting the rescue triangle simpler and faster than ever, no more searching around for a loop of webbing that looks just like all the rest.

The over-head shoulder straps for easy ingress/egress, and eliminates the need for panicked casualties to let go of their anchor rope. The quick connect chest buckle fully secures the casualty and allow first responders quick access to the casualty.

The triangle has its own self storage pocket for tidy storage.

Accredited to: EN 1498:2006 Class B
Max User Weight: 140kg
