

TRAINING COURSE

Product ID: RGT4

Description: Rooftop Operative

Course:

This full day course is aimed at operatives, managers, supervisors and safety advisors that work or manage the way work at height on roofs is undertaken, taking an in-depth look at the working at height regulations 2005 and guidance for work on roofs.

Course Objectives:

This specialised course will identify the hidden dangers when working on and around flat and pitched roofs and highlight common lack of anchorage.

The course will give a detailed view of suitable commercially available portable man safe systems, edge protection and its safe instalment. The characteristics of fall protection equipment and the benefits of fall restraint over fall arrest.

Delegates will be assessed during the practical session using associated roof access equipment such as temporary and permanent fall protection systems, adjustable restraint, positioning equipment and permanent and temporary anchor points.

Who will benefit?

Anyone involved in working on flat or inclined roofs.

Course Content:

- Legislation / mechanics of a fall
- Pre-use inspection (includes practical exercise)
- Anchor points and devices
- Donning a harness (includes practical exercise)
- Storage, care and maintenance
- Rescue requirements and options
- Theory test paper (multiple choice)

Training Methods:

Lectures, printed course material, hands on equipment, practical exercises and pre-use inspection exercise.

Certification:

Successful delegates will receive a 3 year RidgeGear certificate on completion.

PPE Requirements:

Delegates must provide their own comfortable clothing, protective footwear and prepare for all weather conditions. Delegates may be required to provide their own PPE.

Course duration / Number of delegates:

The course is designed for up to 6 delegates at any one time and is held over a half day, typically 09:00 16:00.
