

TRAINING COURSE

Product ID: RGT7:SF
Description: Slipform Rescue, Emergencies & Evacuation
Duration: 1 Day
Max Number of Delegates: 6

Prerequisite:

- Delegates must show evidence of their competency for working at height. It is advised that anyone attending the course has completed the 'RGT1 Harness Training & Work at Height Awareness' or equivalent recognised course.
- Delegates must meet the minimum age of 18 years and be fluent in English.
- Delegates must be medically fit and be physically able to carry out the practical elements of the course. Delegates will be required to sign a medical statement from before the start of the course.

Course:

This training course is designed for rescue teams who are responsible for rescuing and evacuating workers who are within a Slipform structure. This course has been designed with evacuation in mind and the skills learnt would be required if all other means of evacuation from within the Slipform structure were compromised. Delegates will be trained on how to evacuate themselves or others from high places, passing through the different levels of the Slipform decks, safely to the ground. Rescue teams will need to be wearing fall protection equipment so the training will also cover rescue procedures for suspended operatives. Delegates will have an understanding of their duty's and what is required from them which is detailed in the Working at Height Regulations 2005.

Course Content:

- Working at Height Regulations 2005
- LOLER requirements
- Legislation and guidance
- Suitable selection of anchor points, including correct set up and use of a tripod
- Rescue equipment
- Raising and lowering techniques
- Stretcher fitting
- Rescue harness fitting
- Identification of safe descent paths
- Suspension intolerance
- Evacuation of multiple people, including self evacuation
- Evacuation from a man riding basket
- Rescue and evacuation from a leading edge
- Use of a tag line
- Casualty care

Training Methods:

This training course combines theory and practical training methods to ensure delegates receive the information required in preparation for their assessment. Printed course material, practical demonstrations and hands on training will be conducted throughout the course. All training is designed and delivered to meet BS 8454:2006 code of practice for the delivery of training and education for work at height and rescue.

Certification:

On successful completion of the course, delegates will receive a 3 year RIDGEGEAR certificate. Delegates must keep up their CPD by attending regular training to refresh their skillset.

PPE Requirements:

Delegates must provide their own comfortable clothing, protective footwear, safety gloves, high visibility jacket and prepare for all weather conditions. Delegates may be required to provide their own PPE but this will be communicated by RIDGEGEAR in the planning stage of training.
